Reasons for Allowance

1. The following is an Examiner's Statement of Reasons for Allowance:

The prior art of record fails to teach or fairly suggest, either singly or in combination, a method for selling a quantity of electrical energy between two participants by connecting the participants to a database display, consummating a transaction between the participants, and curtailing the transaction between the participants, in the specific manner and combinations recited in independent claim 16 (now renumbered claim 1), and wherein the transaction curtailment process is as specifically described at page 28, line 1 to page 36, line 1 of the specification. The prior art of record also fails to teach or fairly suggest, either singly or in combination, a method for selling a quantity of electrical energy between two participants comprising the steps of computing a performance index associated with a reliability for either participant and of displaying a reliability indicator associated with any offer to sell electric energy, in the specific manner and combinations recited in independent claim 17 (now renumbered claim 2), and in the manner described in detail

at pages 19-20 of the specification. The prior art of record also fails to teach or fairly suggest, either singly or in combination, a method for selling a quantity of electrical energy between two participants, comprising the steps of displaying a price for next hour offers; displaying next hour offers during the current hour; and stopping the consummation of next hour transaction at a predetermined time during the current hour, in the specific manner and combinations recited in independent claim 18 (now renumbered claim 3). The prior art of record also fails to teach or fairly suggest, either singly or in combination, a method or data processing system for facilitating the trading of electrical energy units between buyers and sellers and comprising the steps of (or means for) storing a list of transaction conditions, including a first parameter which indicates a limit on an electrical energy unit transmission capacity and a second parameter indicative of a contractual agreement between the buyer(s) and the seller(s), and facilitating the trade (i.e., consummating the transaction) only when the stored transaction conditions are satisfied, in the specific manner and combinations recited in independent claims 19 and 31 (now renumbered claims 4 and 16, respectively).

Claims 20-30 and 32-39 (now renumbered claims 5-15 and 17-24 respectively) incorporate the novel and non-obvious features of independent claims 19 and 31 (now renumbered claims 4 and 16,
